Due: Monday, November 2, 2026, 11:59 PM

COMP 3613 Assignment 2 15%

Description

In this assessment you will continue working on assignment 1, perform test planning and implementation.

Tasks

Test Planning

Create a User Acceptance Test with reference to the wireframe diagram. Create Unit Test & Integration Test Plans.

Test Implementation

Implement Unit & Integration tests with pytest. Create a postman collection for API tests.

Test Reporting

Demonstrating passing tests, and performing User Acceptance Testing.

Deliverables

Submit 1 PDF document containing the following

- Name & ID
- Project Description
- Use Case Diagram
- Entity Relationship Diagram
- Application Wireframe
- Test Plans
  - User Acceptance Tests Plan
  - Unit Tests
  - Integration Tests
- Implementation
  - link to repository
  - Unit Tests
  - Integration Tests
  - API Tests (postman collection exported to json in repo)
- Reports
  - Unit Tests Report (screenshot of test results)
  - Integration Tests Report (screenshot of test results)
  - Postman Collection Run report screenshot

Breakdown

Component	Description	Percentage
Implementation	• Appropriate views implemented to facilitate minimum viable feature set • Authorization implemented • Views follow REST API conventions	25
Test Plans	• Appropriate unit testing of modules in isolation • Integration tests covers main functionality of the application • UAT's give reasonable tasks/success criteria that can be completed/validated by the user	25
Test Implementation	• Tests implemented according to test plans • Unit & Integration tests are runnable via the CLI • All postman test scripts implemented for API testing • Postman collection runnable	25
Test Reporting	• Screenshots of passing unit and integration tests • Screenshots of passing collection run on postman • Completed User Acceptance Test report	25
Total		100
